

Equipment Overview

Byrne's fleet of over 2,000 generators range in size from 6kVA to 1550kVA with the capability to scale up to multi-megawatt power plants with synchronised sets.

Supporting this we provide bunded fuel tanks, drip trays, cables, secondary distribution and transformers.

All hires can be adapted to individual needs and generators are available for short or long term hire, and come with our unique guaranteed 24/7 service and support back-up.

In addition our in-house technical teams can provide a pre-hire advisory service to ensure your requirement is carefully specified with an appropriate fuel management plan.

Specifications & Key Features

Equipment	Key Features
Generator	<ul style="list-style-type: none">- Generator sizes range from 6kVA up to 1550kVA.- Designed for multiple voltage 220V/400V/440V/480V and switchable frequency 50HZ and 60HZ.- All generators are fitted inside silent canopies with sound attenuation standard of around 80db@7m.- Generators above 200kVA are all fitted with electronic load sharing synchronising and auto load management controllers type DSE-8610.- All generators can be remotely monitored upon request.- All generators are specified to work in harsh and hot environments and up to 50°C temperatures.- Event generators are fitted with power lock connectors and cee- form sockets for quick and efficient connections on site.
