

Case Study

CEER

When: 2024 - On going

Where: Riyadh, KSA

Site: Prototype Workshop - CEER Auto, Riyadh

Client Brief: CEER is a joint venture between the Public Investment Fund (PIF) and Foxconn. CEER will design and manufacture vehicles in Saudi Arabia, tested to the highest global automotive quality control and safety standards.

Equipment Supplied: 5 x 1000 kVa generators, with complete low voltage, secondary distribution network comprising of multiple distribution boxes and 9,000 meters of underground cables with complete civil scope.

Solution: Provided seamless power supply for the prototype workshop at the largest electric vehicle manufacturing facility in KSA. Ensuring consistent power stability for major equipment and critical machinery.

Result: We successfully commissioned the workshop and are providing un-interrupted power supply to the prototype facility.

Enabling operational efficiency through equipment rental and lease solutions
